Project Brief: Personal Website

A personal website about me. It will be a get to know me that will include my goals and interests all in one place. The site will be of a professional tone.

Interests

*Note: I spent a lot of time thinking of what kind of website I wanted to create, ended up choosing a personal website in which I can expand on my interests pages. Possibly make a separate website and link it as a side project.

Side Project: I recently got addicted to the show *The 100* on the CW network. I want to make a website that is in their perspective.

This was an one of my ideas as a main project, but wasn't sure if could do it. So, if I have the time, I will expand it.
